The intelligent solution with infrared short-wave technology

# The new TERM Generation in all colors.

ALSO AVAILABLE AS  
**LOW  
GLARE**

## TERM 2000 IP67

The innovation for an uncomplicated heating in outdoor areas: the full waterproof TERM 2000 IP 67 – from now on also available in every RAL-color. Designed and exclusively equipped with a special gold-tube, it achieves a very high heat output and durability of up to 5000 hours due to its open design (without protection glass). Elegant, compact and simple to use, this heater was created for simple heating of outdoor areas. It is also ideally suited for integration in tent and parasol systems. Depending on the power needed, the TERM 2000 IP67 is also available as a multiple heater with two or three units. The new rapid assembly-system simplifies the installation on walls and ceilings.

TERM TOWER

## TERM TOWER/TERM TOWER HANGING

All the advantages of the TERM series – also in freestanding or as a ceiling suspension version – as a TERM TOWER or TERM TOWER HANGING! Ideal for hotels and restaurants, the TERM TOWER offers optimum heating power for all indoor and outdoor areas – particularly where other systems could not be used because mounting was not possible. The TERM TOWER series stands out for their efficient space saving functionality as well as for great heat output, design and easy installation. There are many different possibilities of configuration (i.e. light) which guarantee infinite field of applications.

# The versatile SMART heater series.

## SMART IP24

First class heating performance, convincing in form and function. Its advantages at the first glance: first class, efficient heating performance in a compact and shapely design. This powerful, compact unit is ideal for every outdoor area, terrace or balcony.

## SMART TOWER with integrated controller

First class portable heat is provided by the SMART TOWER for versatile applications in private, commercial and industrial areas. Combined with the comfort of an integrated dimmer, the SMART TOWER sets the benchmarks with its vertical space-saving configuration.

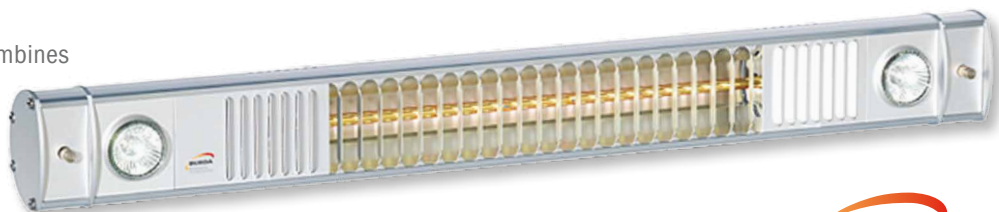

# The Heating & Cooling-Sensation!

## TERM 2000 LIGHTSYSTEM

Our brand-new lightsystems of the TERM RL-Series with one, two, three or four spots (50W, GU10) are perfectly aligned in design and functionality to our TERM 2000 series.

Stand-alone or in addition to already existing

TERM heaters they create an appropriate light on terraces and balconies, on factories and sport facilities and wherever the

“right” light intensity is required. All light systems are IP65 waterproof and dimable - the perfect (ideal) controller are available in our equipment range.

## The intelligent way.

### INTELLIGENT SOLUTIONS

As the pioneer in the field of infrared short-wave technology our unique expertise and experience enables us to move the technology forward. The innovative products we offer are the best evidence for intelligent solutions. Producing efficient, energy saving instant heating or cooling products is our passion. Customized solutions, perfectly attuned to people and the environment guarantees an almost unlimited range of uses.

### INTELLIGENT ANSWERS

We listen, identify and understand relevant customer needs to find the right answers together. It goes without saying that we are passionate, flexible, customer focused and reliable.

### INTELLIGENT REALIZED

Highest standards in the production process and the use of sophisticated materials represent BURDAWTGs claim of always offering its customers only the very best in terms of high quality, design, functionality and high performance. This is the only way possible to set standards worldwide.

### INTELLIGENT ADVANTAGES

- Original since 1990
- Unique quality standard
- High quality processing and manufacturing depth
- High quality substance and components
- Increased durability and burning duration
- Efficiency straight to the point
- Emission-free and clean (depending on electricity mix)
- Broad power spectrum up to 18 kW
- Wide choice of colors and models
- High quality elegant design
- Long-lasting, weatherproof aluminum

### INTELLIGENT AREAS OF USE

- Hotel and gastronomy business
- Balcony/terrace/conservatories
- Camping
- Garages/factories
- Halls (production, warehouse, trade fair, etc.)
- Hangars
- Sport (swimming pool, golf house, etc.)
- Churches
- and many other uses

### THE BRANDNEW „LOW GLARE“ HEATER GENERATION FROM BURDAWTG.

The new „Low Glare“ heater series from Burda Worldwide Technologies GmbH offers instant heat and an extraordinary candle-light atmosphere at the same time. The special coating of the lamps inside and outside filters and reduces light by 80% without loss of heat. In that way it creates a very soft light source, which does not influence existing ambience illumination on terraces and on balconies.

Low Glare products offer a convincing combination of very efficient infrared heat as well as perfect light reduction for a candle light atmosphere. In the gastronomy as well as at home, the new product series „Low Glare“ is the new successful solution in the markets. As of now optional available in the high quality heater series TERM2000, IP24, IP65 and IP67 as well as for all Perfectclime heaters.
